SUMMARY

Aspiring MERN Stack Developer with an enthusiasm for building dynamic web applications. Recently engaged in developing scalable applications using the MERN stack, honing skills in frontend and backend technologies. Eager to contribute to impactful projects by leveraging a keen understanding of the MERN ecosystem and a strong drive to learn and grow in a collaborative environment.

EXPERIENCE

Frontend Developer

Cloud Infotechs

November 2024 - April 2024, Pune

- I worked as a Frontend Developer Intern at Cloud Infotechs, where I contributed to designing and developing user-friendly, responsive web interfaces, ensuring seamless user experiences and optimized performance.

PROJECTS

Smart Digital- UMINO

uminex.netlify.app/

- "Uminex" is an e-commerce platform for electronic product shopping, designed with a modern and responsive frontend using React. The project emphasizes seamless navigation, user-friendly interfaces, and efficient shopping experiences.

StyleCanvas

stylecanva.netlify.app/

- "StyleCanvas" is a visually captivating portfolio website tailored for a fashion designer to showcase their creations, inspirations, and design philosophy. It highlights their portfolio with interactive galleries, modern aesthetics, and an intuitive layout, offering an immersive experience for potential clients and collaborators.
